ABOUT ME

User Experience Engineer and entrepreneur with a passion for building state-of-the-art, easy to use and beautiful applications for the web. I use imagination, technology and strategy to understand customers' needs.

EXPERIENCE

Software Engineering UX/UI Design Immersive December 2021 - Present

General Assembly - Remote

Successfully completed 500+ hours of expert led instruction in JavaScript, HTML and CSS, with a focus on ExpressJS, REST APIs, React, Python and Django.

Developed projects, including:

- A Slot Machine Game using JavaScript, HTML and CSS.
- A web app to keep recipes built on the REST architecture.
- An App to show videos of soccer game highlights using React.
- A MERN (MERN stands for MongoDB, Express, React, Node) web App to help people find doctors in their area.

Developed UX design projects, including:

- Designed a product to help college students to learn financial skills.
- Developed High Fidelity Prototypes using Figma.
